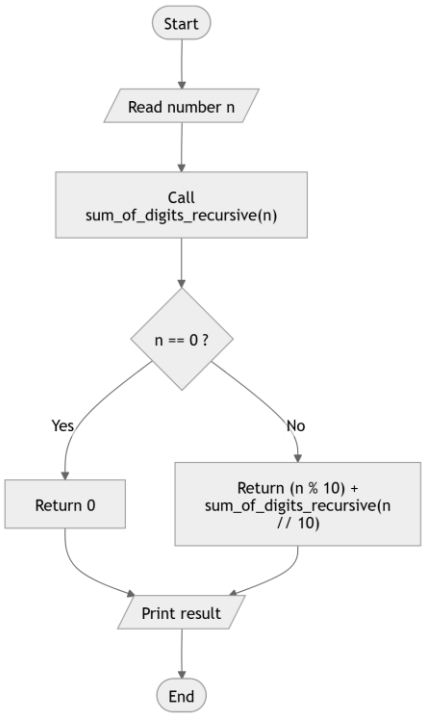
EXPERIMENT 11.1.2

Flowchart



Algorithm:-

Step:-1 Start
Step:-2 Read input number `n`
Step:-3 Call function `sum_of_digits_recursive(n)`
Step:-4 Inside function:
  a. If `n == 0`, return `0`
  b. Else return `(n % 10) + sum_of_digits_recursive(n // 10)`
Step:-5 Store result
Step:-6 Print result

Step:-7 Stop

11.1.2. Sum of Digits using Recursion
04:08
Write a recursive function sum_of_digits_recursive(n) that calculates the sum of the digits of a given non-negative integer n.
Input Format:
• The input consists of a single non-negative integer n.
Output Format:
• The output should be the sum of the digits of the non-negative integer n.
Constraints:
• $0 \leq n \leq 10^9$
